

RESITE LCMS

Bring Learning to Your End Users

Bring all learning content together into one powerful Knowledge Portal. RESITE-LCMS offers a lightweight learning content management system that allows you to design courses around a variety of source materials, fitting the needs of your users.

Make it automatic. Add RESITE Recorder and RESITE Publisher to your LCMS purchase.

Make your help course creation easy by adding RESITE Recorder and Publisher to your SP purchase. RESITE Recorder quickly and consistently captures and documents virtually any application to a single source file. From there, RESITE Publisher converts Recorder files into a host of documentation, help, and support formats, then delivers it automatically to the LCMS application.

Dynamic Authoring Environment

Maintain total control. RESITE LCMS gives you the tools you need to create courses rich with content and complete with assessment and certification levels, giving you a total learning content management system.

Content Management by Role

Define and utilize content by role. This simplifies the creation of coursework, and makes delivery easy.

Assessment and competency controls

RESITE LCMS helps you to create test and certification levels custom to your companies needs.

Automated integration into RESITE Publisher

Reduce the hassles of manually linking all your content. LCMS integrates with RESITE Publisher, allowing resource materials to be produced using RESITE Recorder and pushed directly to LCMS using RESITE Publisher.

SCORM-compliant learning management, allowing for the upload of other content and courses

Become compliant with ease. LCMS can record results from SCORM compliant resources as well as produces SCORM compliant content packages.

How does RESITE LCMS work?

RESITE LCMS offers a lightweight learning content management system that brings all learning content together into one powerful Knowledge Portal.

System Requirements:

Minimum:

- Microsoft Windows 2000 Operating System (Requires Service Pack 4.0 or greater)

- 2.0 GHz Pentium IV Processor

- 1.0 GB Memory

Disk Space:

- 30 MB for installation; additional space is required for course content. The amount of disk space required will vary, depending upon the size, graphical content and number of documents that are checked in.

Web Server:

- Microsoft Internet Information Server with Index Server

Other Requirements:

- Windows Management Instrumentation (WMI), and Microsoft XML Parser version 3 (MSXML3)

Recommended:

- Microsoft Windows 2003 Operating System

- Dual 2.0 GHz Pentium IV or greater Processor

- 2.0 GB or Greater Memory

Disk Space:

- 30 MB for installation; additional space is required for course content. The amount of disk space required will vary, depending upon the size, graphical content and number of documents that are checked in.

Web Server:

- Microsoft Internet Information Server with Index Server

Other Requirements:

- Windows Management Instrumentation (WMI), and Microsoft XML Parser version 3 (MSXML3)

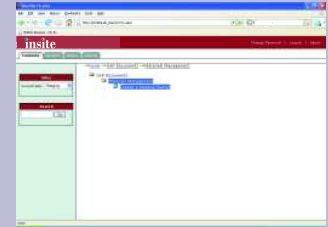

Resite LCMS

Central access point to training competency measurements and support.

Resite Publisher

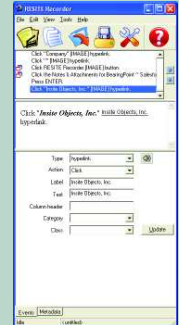

EPSS, repository for simulations

Tightly linked together.

Resite Recorder

Creates content with metadata.

With RESITE LCMS, RESITE Recorder, and RESITE Publisher, you can create coursework faster than ever.

RESITE Recorder

Quickly and consistently capture and document virtually any software application. With RESITE Recorder all keystrokes, mouse clicks, and screen shots are captured, then stored, in a single source file. Enhance your recordings with notes, definitions, and other useful content. Then, output your file into a broad base of material, including job aids, simulations, and help documents.

RESITE Publisher

Automate the delivery of training and support material to your end-users. RESITE Publisher takes content from different sources and integrates it into a single, automatically generated EPSS System. With this robust content creation and publication process, your company can apply documentation standards worldwide.
