

RESITE Publisher

Automatic Content Distribution

Automate the delivery of training and support materials to your end-users. RESITE Publisher provides a centralized, seamless documentation, training and online help solution.

Link it all together. Publisher can create and distribute content from RESITE Recorder into RESITE SP and RESITE LCMS.

Make your content creation easy by adding RESITE Recorder to your Publisher purchase. RESITE Recorder quickly and consistently captures and documents virtually any application to a single source file. From there, you can convert into a host of documentation, help, and support formats. Then connect the material instantly by adding on RESITE SP for quick reference access, or speed up training by adding RESITE LCMS, creating a completely automated training and support system.

Centralize all your help and support

RESITE Publisher takes content from different sources and integrates it into a single, automatically generated Electronic Performance Support System (EPSS). With this robust content creation and publication process, your company can apply documentation standards worldwide.

Wizard feature helps set-up your EPSS in minutes

RESITE Publisher's newly designed wizard helps you create and publish help web sites faster than ever before. Simply follow the instructions, choose your design, and you are on your way.

Automatically create and maintain help for SAP R/3

When you use RESITE Publisher, content is linked to specific SAP transactions automatically. Users have immediate access to SAP eAssistant job aids or Web Help that is based upon their job role, or a specific transaction, via our customized help option. Updates are automatic as well, requiring no additional work to make sure the most accurate materials are available to your end users.

Add simulation to increase end user skills

RESITE Publisher can convert RESITE Recorder files into interactive simulation modules for use in training and refresher training courses. Users have access to interactive, test, and demonstration modes via Web Help, allowing them to keep up-to-date with necessary skill sets.

Expand help and support to include Windows applications

Go beyond SAP. RESITE Publisher not only creates an EPSS, it links content with RESITE SP, meaning you can provide context sensitive help in almost any Windows application. Now you can have a single source for support, bringing help right to your end users.

Top five reasons to choose RESITE Publisher:

Maintains an EPSS, automatically
RESITE Publisher helps you put an EPSS system into place quickly and effectively. Configuration takes a day or less, meaning you can set up uniform guidelines for all content with little effort, allowing you to become operational right away.

Diversifies content into multiple formats

RESITE Publisher connects your files into one source, and can create multiple types of content with RESITE Recorder RST files. When you choose to purchase Recorder alongside Publisher, you can produce a host of documentation from one source including simulations, job aids, BPPs, test scripts, context-sensitive help, and end-user training materials.

Fully customizable Web Help

While we offer standard packaging, you can configure RESITE Publisher to match any of your company's requirements. Website and templates for creating documentation folder structures are included, but can be expanded to meet your needs. Global? You can seamlessly create websites and help to cover your international requirements all at the same time.

Complete control over publishing content

RESITE Publisher is configurable ensure the right content is getting to your users when you desire. Standard installation includes a complete document folder structure to create, test, and release content according to your business standards. Projects coming up? Speed up or slow down the release of content at your pace. RESITE Publisher is flexible to your project as well as company needs.

Flexibility of installing onsite or utilizing the Sitelab system

RESITE Publisher can be securely installed onsite, or if you wish to reduce IT burden, and are a Small/Medium Enterprise (SME), can be accessed via our online training and support system, Sitelab. With Sitelab, you get complete access to the RESITE Performance Suite, paying only for what you use. When you subscribe, RESITE Publisher is hosted securely online, and can be duplicated across business units as well as internationally. For more detailed information, visit www.insiteobjects.com.

System Requirements:

Minimum:

- Microsoft Windows 2000 Operating System
- 500 MHz Pentium III Processor
- 512 MB Memory
- Virtual Memory set to 200MB Initial Size - 350 Maximum

Disk Space:
70 MB for installation; additional space is required to translate source documents into HTML format. The amount of disk space required will vary, depending upon the size and number of documents translated, as well as the number and nature of graphics converted.

eAssistant Job Aids and HTML content (for your web site) will require approximately 200 KB per 1MB of RESITE recorder documentation.

Website: Storage and Delivery of Online Content
File-based system or Web Server. Any Web Server can host a site created with RESITE Publisher, including Windows, Linux and Unix platforms.

Recommended:

- Microsoft Windows XP Operating System
- 2.0 Ghz Pentium IV Processor
- 1.0 GB or Greater Memory
- Virtual Memory set to 250MB Initial Size - 450 Maximum
